COMPETITION ENTRY FOR SOCIAL ENTREPRENEURSHIP PROPOSAL

CATEGORY : WASTE MANAGEMENT USING CREATIVE UPCYCLING At BNCA institutional level

Reduce Waste Reuse Waste

Participants :

1. Neha Adkar

Assistant Professor, Department of Landscape Architecture, BNCA

E-mail : neha.adkar@bnca.ac.in

Mob. No : +9146062185

At domestic level as well as college level we and our students come across different types of waste from various products we use . Few of these products are as follows :

DOMESTIC CARDBOARD/ PAPER WASTE

Food packaging

Online shopping

Plastic Bottles

Oil Cans

COLLEGE CARDBOARD / PAPER WASTE

Waste Sheets and papers

Model remnants

Cardboard Rolls, Cartons, paper bags etc.

Social Entrepreneurship Proposal

- 1. The waste products from home and college have a potential to be up cycled. Our students being from the creative background can come up with numerous ideas on up cycling these waste and putting it to some creative use through design idea competitions.
- 2. The College waste created by the students from Architecture College can be segregated and stored in a dedicated storage space in the BNCA institution.
- The creative ideas can be taught to the economically weaker section students (for eg. Students at Karve stree shikshan samstha campus) / rural communities etc. through workshops or as a skill building activity for women in MKSSS campus / Rural communities.
- 4. The products made from these workshops can be sold at different events such as winter bazaar (@BNCA), outside Exhibitions etc.
- 5. Thus the waste can be responsibly up cycled and reused creating an opportunity for Social Entrepreneurship as well .

I am sure many creative ideas from students of architecture can help create different best from waste items.

Few of the ideas are shared in this and subsequent slides for giving example

Planters from phenyl bottles

Planters from plastic bottles

Furniture from Cardboard rolls

Eco friendly Diaries

Booklets

Book marks

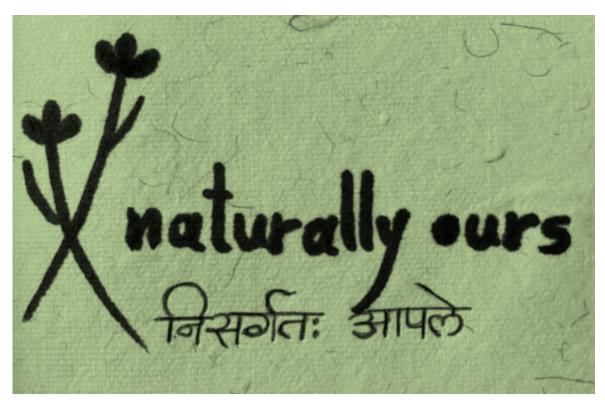

Egg shell Succulent tray

Planters from Plastic Cans

A shift from

"Ours Naturally" to "Naturally Ours" "Taking for granted " to "Taking Responsibility"

THANK YOU
