

BNCA | Events and Activity Reports

Event / Activity title: National Conference on Built Environment and Beyond 2.0: Theory, Practice and Pedagogy 2023

Date & Time: 2nd and 3rd November 2023

Venue: Dr. B.N.College of Architecture, Pune (Online Mode)

Faculty In-charge: Dr. Avanti Bambavale, Ar. Siddhi Joshi and Ar. Mandar Athavale

Faculty Co-ordinator: Ar. Siddhi Joshi and Ar. Mandar Athavale

Students' In-charge: None

NAAC Criteria (if any):

Guest Speakers: Shri. Hitesh Vaidya (Ex-Director, NIUA) and Sumita Singha (OBE, RIBA)

Chief Guest (if any): - None

Objective of this Event: The National Conference organized by BNCA titled “Built Environment and Beyond 2.0: Theory and Practice” aimed at addressing this multidisciplinary nature of the architecture and allied disciplines. The conference invited papers from academicians, professionals, students and research scholars and encouraged them to explore this multifaceted nature of the built environment. The conference was conducted in an online mode for a possibility to bring together diverse group of researchers, experts and practitioners. Papers were invited under the themes of Architecture and Planning, Landscape and Ecology, Art and Humanities, Environment, Culture and Heritage Conservation, Emerging Technology and Services

Summary of the event (150-200 words):

The conference received an overwhelming response and the presentations were followed by discussions and comments from the Session Chair and invited experts. The discussions provided valuable insights on various aspects of the built environment. A double-blind review process was adopted to select the final papers, out of which a few were also selected for publication in NICMAR's Journal titled “NICMAR Journal of Construction Management”. The other papers that adhered to the conference publication guidelines and within the given plagiarism of 15% were selected for publication in the Conference Proceedings.

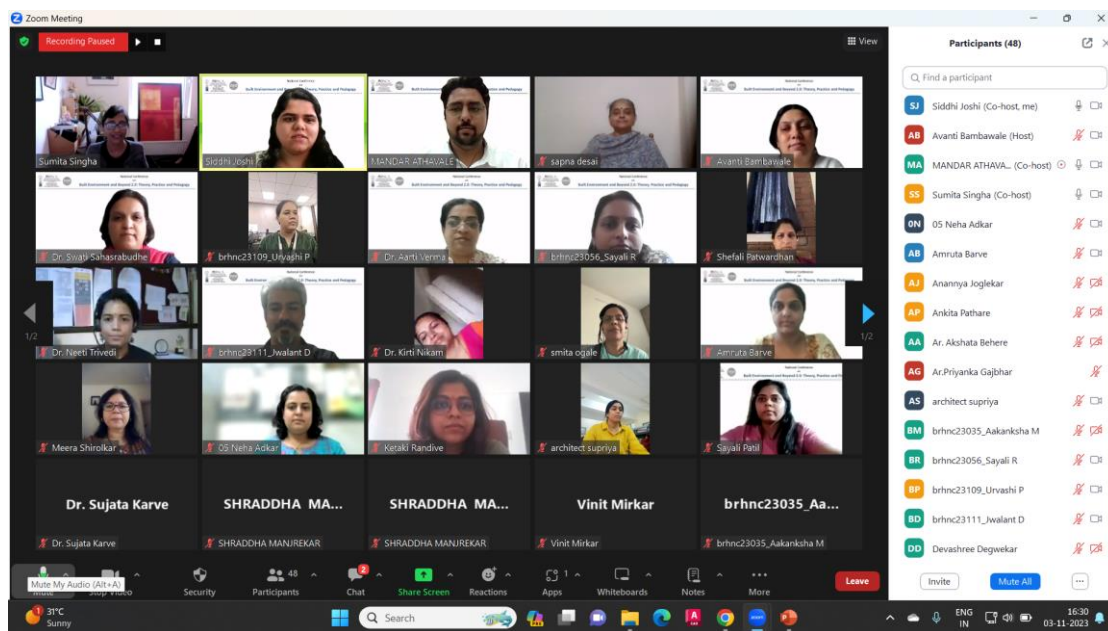

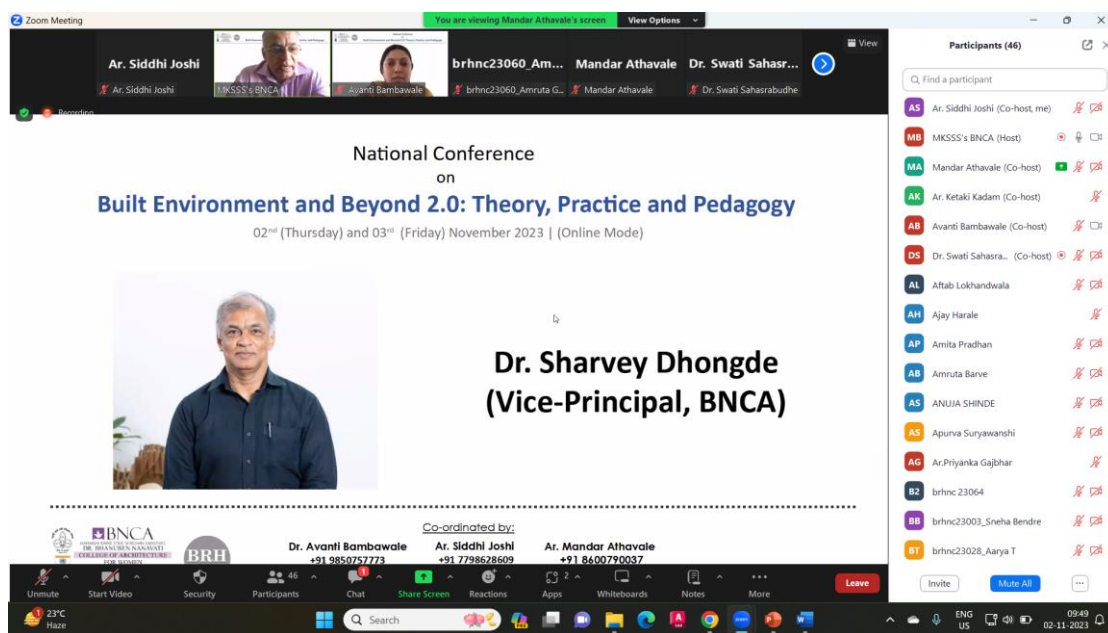

Few of the ideas presented at the Conference had potential to propel significant advancements in the field of built environment, while some research findings started the dialogue about exploration and integration of multidisciplinary approach. Research related to Urban Planning and Design highlighted theoretical integration

MKSSS's Dr. Bhanuben Nanavati College of Architecture for Women, Pune with practice and potential to explore perspectives related with city's planning and management and received the highest number of papers. Overall, the presentations covered a diverse range of topics from all the domains related to the Built Environment.

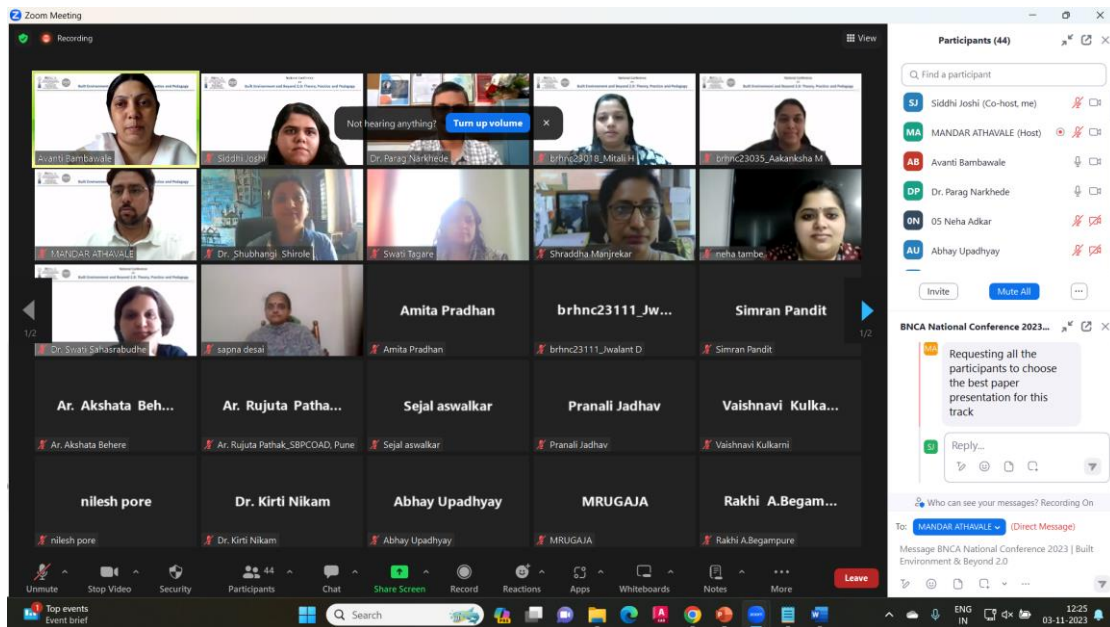

The National Conference 2023: Built Environment and Beyond 2.0: Theory, Practice and Pedagogy organised by Dr. Bhanuben Nanavati College of Architecture and BRH received 44 papers out of which 6 manuscripts were selected for publication in the NICMAR Journal of Construction and Management.

Abstract:

Street vending is not only one of the most prominent, observable and prevalent forms of the informality in urban areas; it is also one of the most resilient forms of the informal urban economy. It contributes towards the generation of economic activity at the neighborhood scale and also adds value to urban living by providing a necessary convenience of more direct access to numerous commodities and services for a far wider demographic spectrum than addressed by most formal means of distribution. This research focuses on the city of Mumbai, the financial capital of India, and attempts to identify the specific relationships that street vending activities develop with the public spaces within which they are conducted and the impacts it has on these spaces. It also investigates the influence that the physical form and spatial characteristics of the public space have on the type of vending activity and the manner in which it is conducted. The research examines the existing policies and legislation that govern street vending in India, as well as the specific scenarios that exist as the ground reality for street vending activities. It also relies on available scholarly literature and established theoretical concepts to develop a methodology to study these specific scenarios and identify the nature of the intrinsic interdependence between urban public spaces and street vending activities. A matrix of evaluation is derived from this methodology and applied to various areas of the city where street vending is prevalent to obtain and analyze tangible and measurable data. The findings reveal identifiable patterns of street vending associated with specific typologies of public spaces and these are organized into distinct categories. The research concludes with specific recommendations for developing a regulatory tool kit that addresses the needs and concerns of street vending activities in the context of the particular public spaces that host them while also ensuring that other activities of a public nature that are conducted in the same public spaces are not impacted adversely.

Keywords: *street vending; urban informal economy; public spaces; social inclusion; regulatory controls*

The built environment today is not limited to just individual buildings but also encapsulates the surroundings, urban patterns and morphology, social and political circuits, services and innovations in technology. The multidisciplinary nature of the built environment has brought a shift in the way we perceive architecture and environment around. With the paradigm shift there have been transformations in architectural practice, theory and pedagogy. This shift has presented various lenses and tools to explore the tangible and intangible aspects of built-unbuilt environment.

The National Conference organized by BNCA titled "Built Environment and Beyond 2.0 : Theory and Practice" aims at addressing this multidisciplinary nature of the architecture and allied disciplines. The conference invites papers from academicians, professionals, students and research scholars and encourages them to explore this multifaceted nature of the built environment.

Submission Guidelines:

For Abstract: (300 words), Keywords (3-5)

Word limit for full article including manuscript text and references is between 2500 and 3000 words.

(Note: Selected Papers will be published in UGC Care journal after review. The Article Processing Charge will be paid by the author as per the journal norms. The other presented papers will be published in the Conference Proceedings with ISBN No)
